Video conferencing

Google meets, zoom, Microsoft teams

- Video conferencing is a meeting with two or more participants who are participating from different locations. They use a computer connection, audio, and video to connect. Video conferencing can be used for team meetings, webinars, product demos, job interviews, and more.
- Some of these apps include **Microsoft Skype, Zoom, Apple FaceTime, Google Hangouts.**

Advantages

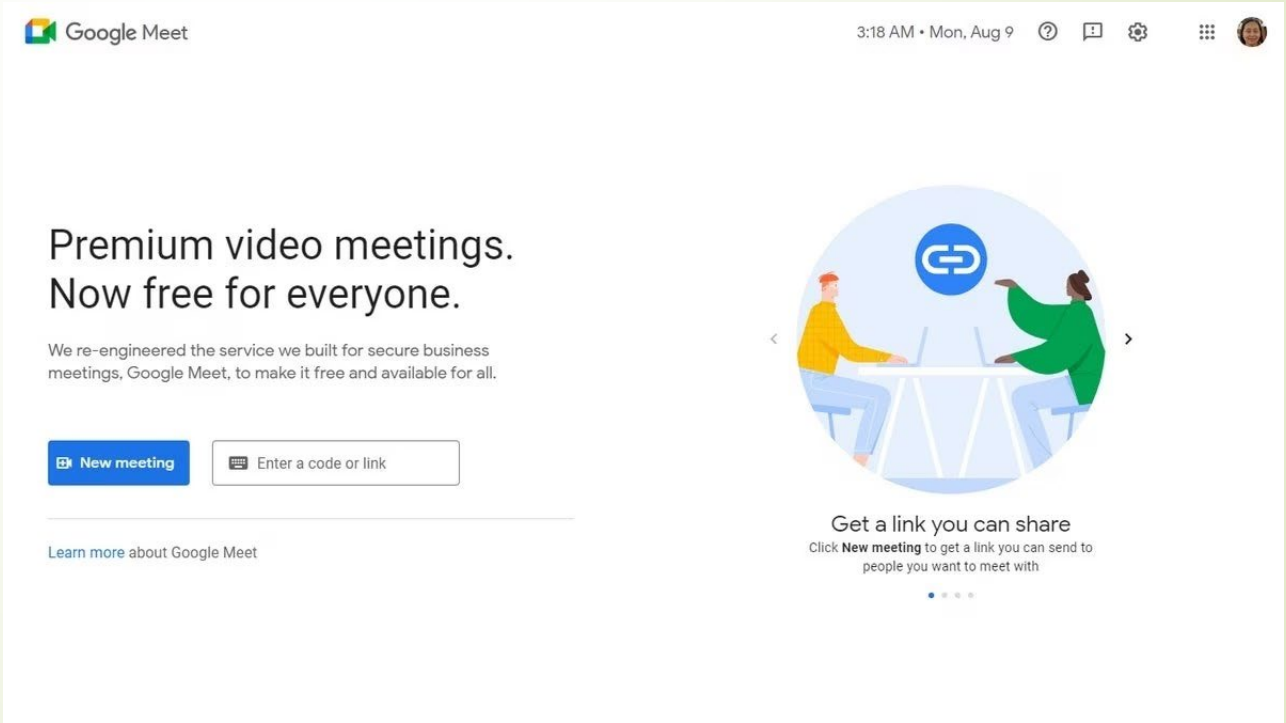

- It is economical and less time-consuming than traditional meetings or phone calls because it eliminates the need to waste time on traveling and preparing for meetings.
- It is cost-effective for companies to conduct video conferences because they can use the same resource to engage people from multiple locations rather than have multiple resources present at different locations. It is also cost effective since all that is required for a video conference would be a webcam, the required software, laptop, and a high-speed internet connection.

Google Meet

- Google Meet lets you hold video meetings with your co-workers — or family and friends — using your PC's webcam or the selfie camera on your phone or tablet. It works as a web app in a desktop web browser, and it's also available as a mobile app for Android and iOS.
- **Free vs. paid versions of Google Meet**
- If you're hosting a meeting using a free Google user account (such as Gmail), then up to 100 people can attend your meeting. Your meeting can run up to one hour. If you want to extend, it will available on paid version.

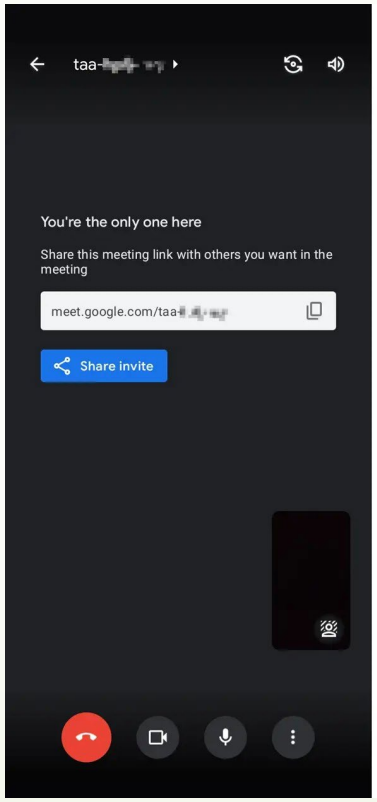

Set up a meeting in Meet

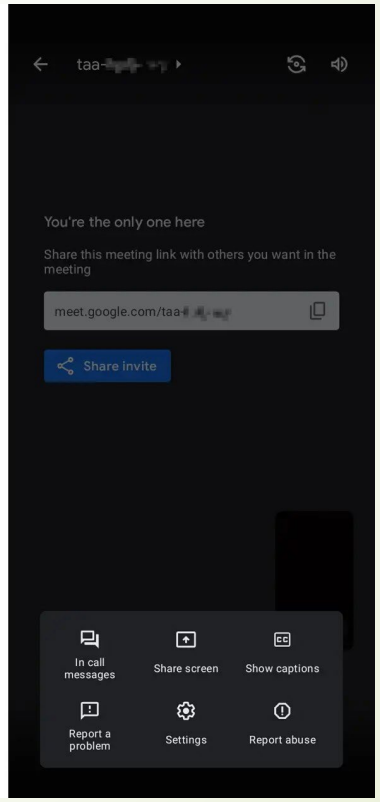

- When you launch Meet in a web browser, you'll see a screen like this:

- Create a meeting for later
- Schedule in Google Calendar
- Start an instant meeting

In meeting options

Zoom

- Zoom is a video conferencing platform that can be used through a computer desktop or mobile app, and allows users to connect online for video conference meetings, webinars and live chat.

Start a Zoom meeting

- Sign in to the Zoom web portal and click **Meetings**.
- Hover your cursor over the entry for your scheduled meeting and click **Start**.
  Note: If you do not have any scheduled meetings, click **Schedule a Meeting**. Complete the required information on the next page and click **Save**. Now hover your cursor over the meeting entry and click **Start**.
- The Zoom application will launch automatically to start the meeting.

Join a Zoom meeting

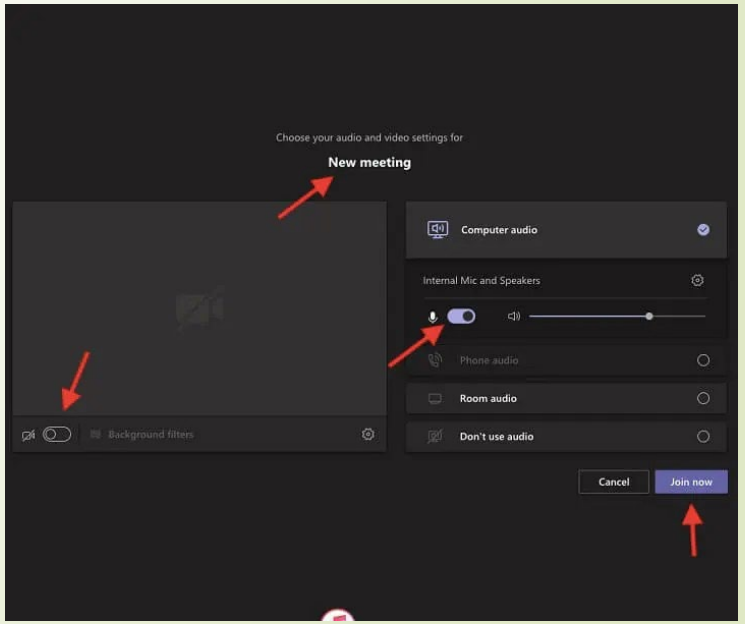

- Open your meeting invitation in your email or on your calendar.
- Find the Zoom meeting link and click it. On most invitations the meeting link will appear under the **Join Zoom Meeting** heading**.**
- Click **Allow** if you are prompted to open Zoom.

Microsoft Teams

- Part of the Microsoft 365 product family, Microsoft Teams is a business communication platform and collaborative workspace that enables productivity. Launched in 2017, Microsoft Teams has experienced massive growth due to remote working during the pandemic and now has over 100 million active users

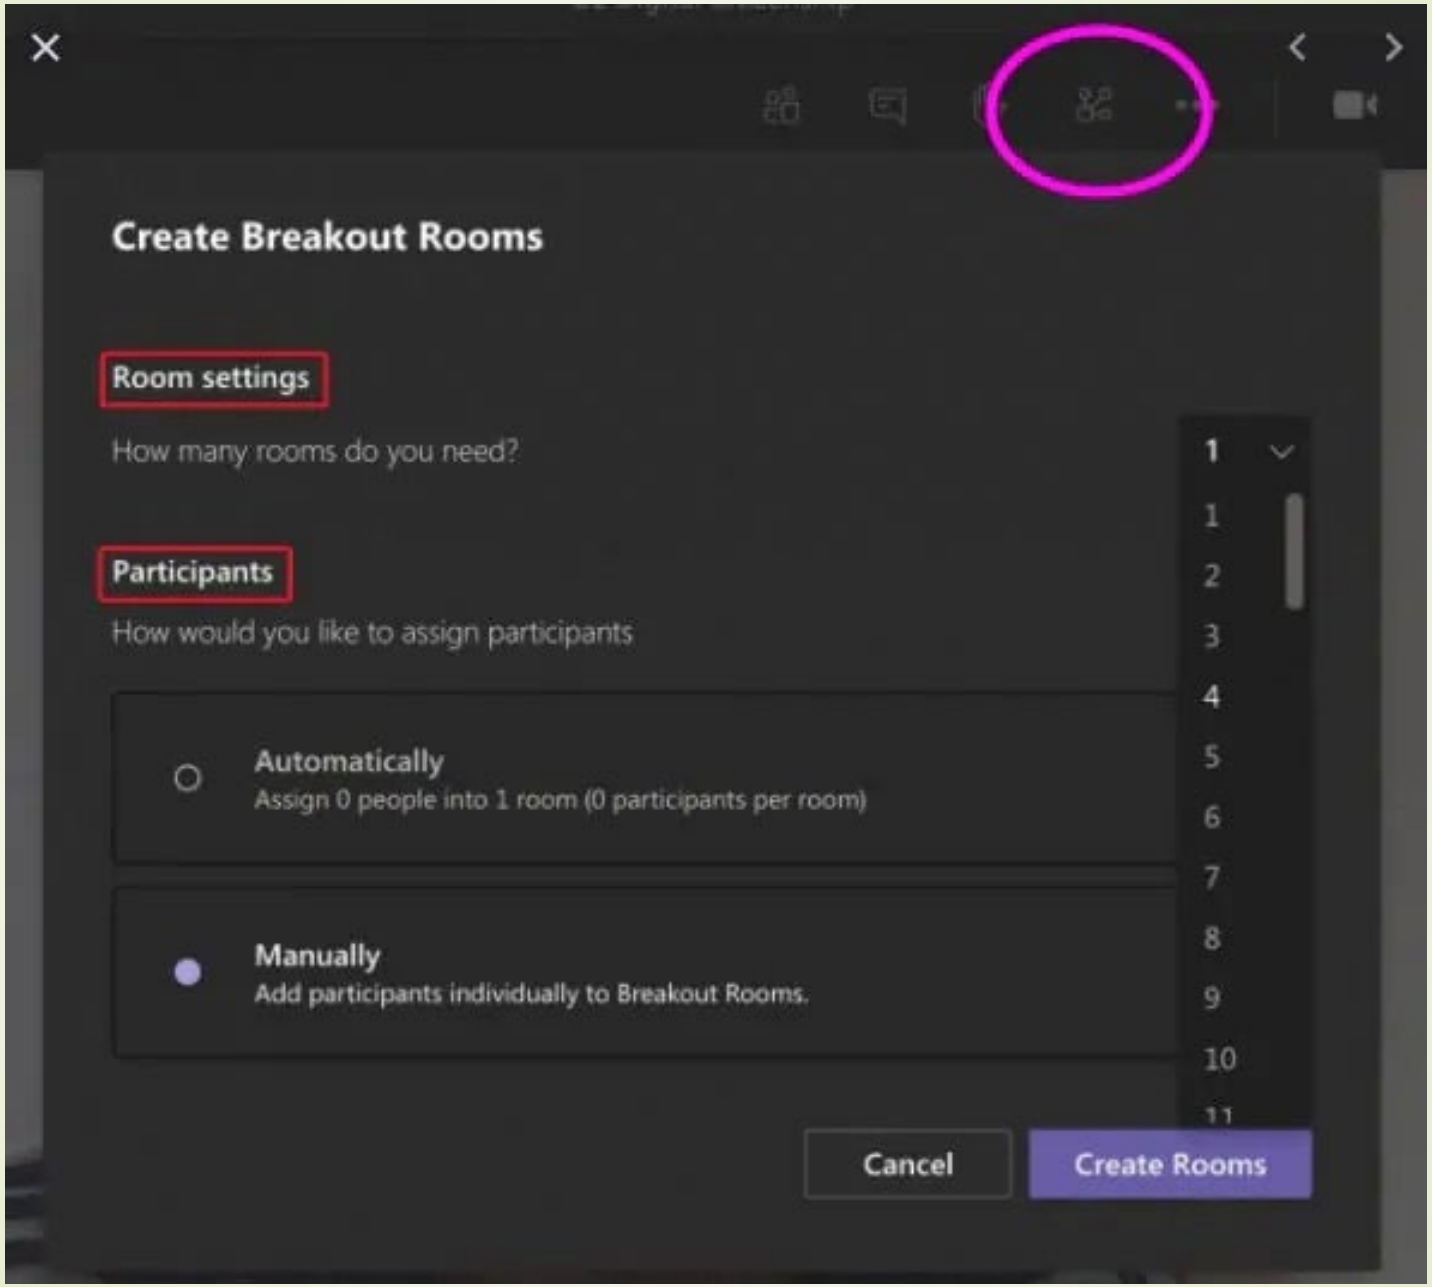

Set up a Microsoft Teams video conference

- If you haven't already, create an account and sign in. Microsoft Teams can be accessed via web browser, desktop app, or mobile app.
- When you have opened Teams, click the "Meet" icon located in the top-right corner of the screen.
- Choose between **a)** Meet now or **b)** Schedule a meeting.

Breakout rooms

- This feature, which Microsoft began rolling out in December 2020, enables the organizer to create sub-meetings within the main Teams meeting.
- Organizations can choose how many breakout rooms they need, and assign participants automatically (into equal-sized rooms), or manually, assigning participants to rooms as you choose.
- Users can access this feature by going to Profile > General Settings, clicking on *turn on new meeting experience*, then restarting Teams.

Social media Applications

LinkedIn, Facebook, Instagram, WhatsApp, twitter

LinkedIn

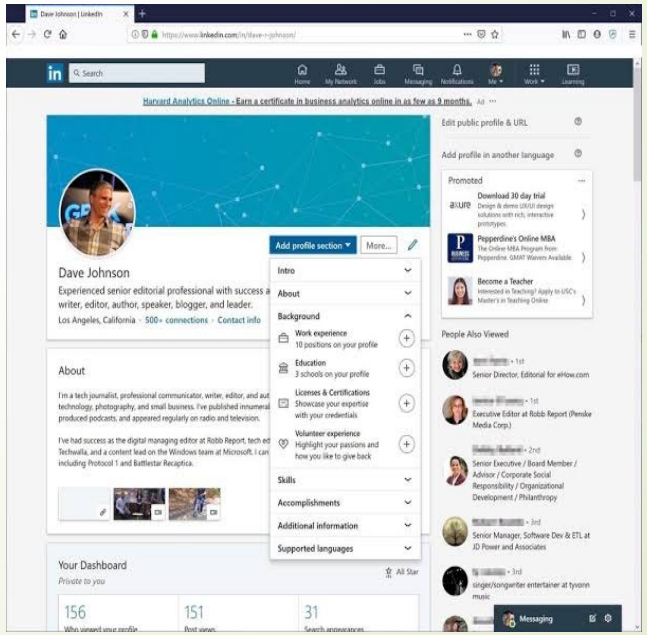

- LinkedIn is the world's largest professional network on the internet. You can use LinkedIn to find the right job or internship, connect and strengthen professional relationships, and learn the skills you need to succeed in your career.
- LinkedIn is different from other social networking sites, like Facebook, Twitter and Instagram, in that it is designed specifically with business networking in mind.

How can someone sign up for a LinkedIn account?

- Go to linkedin.com, and click Join now. You are asked to enter your first name, last name and email address, as well as to create a password. You are also asked to select your country/region and primary language.
- After you have entered all of the required information, click Join LinkedIn. You are then taken to a page where you can complete your profile by adding additional information about your work experience, education, skills and interests.

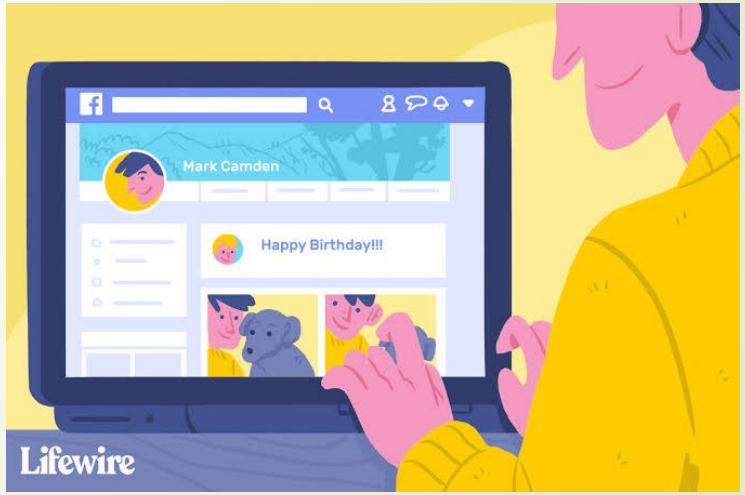

How can someone sign up for a LinkedIn account?

- Once you have completed your profile, you can start connecting with other LinkedIn members.

Facebook

- Facebook is a website which allows users, who sign-up for free profiles, to connect with friends, work colleagues or people they don't know, online. It allows users to share pictures, music, videos, and articles, as well as their own thoughts and opinions with however many people they like.

Facebook

- Two profiles are connected with both users able to see whatever the other person posts. “Facebookers” can post almost anything to their “timeline”.
- Even email, another relatively new technology, is of secondary importance to teens who use Facebook to do the majority of their communicating.
- Facebook gives people control over what they share, who they share it with, the content they see and experience, and who can contact them.

Instagram

- Instagram is a free photo and video sharing app available on iPhone and Android. People can upload photos or videos to our service and share them with their followers or with a select group of friends. They can also view, comment and like posts shared by their friends on Instagram.
- the menu bar at the bottom, it has five tabs: Home, Search/Discovery, Reels, Shop, and Profile.

How to sign up for Instagram

- Instagram was originally meant for mobile devices.
- You should, therefore, download the iPhone or Android app to register an Instagram account. Once you download the app, you can easily login through Facebook. After signing up, you can change your profile picture and edit your information, which includes a brief 150-character summary and the ability to link a website.

Whatsapp

- WhatsApp is a free cross-platform messaging service. It lets users of iPhone and Android smartphones and Mac and Windows PC call and exchange text, photo, audio and video messages with others across the globe for free, regardless of the recipient's device.
- The main draw of WhatsApp is it allows you to send and receive calls and messages using only an internet connection, which means it's virtually free to use and ideal for international calling. There are no fees to sign up, and no data plan allowances to worry about.

WhatsApp's core features

- Voice and video calls
- Voice messaging
- Photos and video sharing
- Document sharing
- Desktop access
- WhatsApp Business

Twitter

- Twitter is a free social networking site where users broadcast short posts known as tweets. These tweets can contain text, videos, photos or links.
- a combination of blogging and instant messaging -- for registered users to post, share, like and reply to tweets with short messages. Nonregistered users can only read tweets.

Searching on Twitter

- In the search bar, users can type in a person, topic or keyword to search. There is also an #Explore function to search for keywords and trending topics.
- Twitter determines what is trending based on an algorithm and users' preferences, locations and interests.
- To help limit fake accounts, Twitter created the verified account symbol, which indicates the account is legitimate and belongs to the person or company. To get verified, Twitter confirms the identity of the individual or company.
