ICT in Education

Sources of online education courses (Coursera, cdX, Udemy, Khan Academy, etc.).

What is Coursera?

Coursera is an online learning platform featuring courses, degrees, certificate programs, and tutorials in a wide range of subjects.

Over 300 leading universities and companies provide instruction, including Stanford, Duke, Google, and IBM.

Learning experiences range from targeted hands-on projects to comprehensive, job-ready certificates and degrees.

How does Coursera work?

Coursera prioritizes top-quality learning through evidence-based online teaching and learning strategies.

The average rating across courses on the Coursera platform is 4.7 out of 5 stars, with 73 percent of learners who complete courses reporting positive career-related outcomes.

What is a Professional Certificate on Coursera?

Professional Certificates are designed to focus on job-ready skills, making them an excellent choice for those starting a new career.

They are training programs led by industry experts such as IBM, Meta, Google, Salesforce, Microsoft etc.

Upon completion of the program, you'll earn a Professional Certificate from the offering institution confirming your successful completion of the training.

Can I earn a degree on Coursera?

Yes! Coursera partners with leading universities to host fully online bachelor's and master's degree programs in business, data science, public health, computer science, engineering, social science, and more.

With tuition well below most on-campus degree programs, online degrees on Coursera are designed to allow students to invest in their education and increase their earning potential post-graduation.

Upon graduation, you'll earn a credential from the university you studied with and become a part of that institution's alumni network.

Financial aid and scholarships are available enrollment options.

CDX

CDX is a trusted training partner to hundreds of school districts, institutes of higher education, and aftermarket providers.

Training material is easy to read and the online portion along with the workbook helps to really drive home the information in a meaningful way.

CDX

Distance learning can be used for education when in-classroom experiences are not possible, but it can also be much more.

By implementing distance learning, students can develop valuable self-directed learning skills, become more skilful at identifying problems, and strengthen critical-thinking skills through application.

Complete with robust online components, CDX Online is the perfect resource to implement digital instruction and apply remote learning solutions to your curriculum.

Distance Learning Tips

Embracing Video Conferencing: With distance learning more prevalent than ever before, you're likely relying on video conferencing to meet with colleagues, teach classes, and perhaps even to train your students. To ensure you are set up for success on your next video call, we've put together some tips and tricks to help you master this essential medium. Watch the video to the left to learn more.

Instructor Support: In addition to giving your students your email address, there are additional strategies to utilize when offering support and assistance to a virtual classroom. Establishing virtual office hours, or consistent times when you will be online to answer questions or review material, is one way to efficiently offer your support. Watch the video to the right to learn more.

Distance Learning Tips

Consistent Communication: If students aren't attending class in person, keeping them regularly informed can help maintain their engagement. With routine check-ins and consistent messaging, students are reminded that there is someone on the other side of the screen. Watch the video to the left learn more.

Goals and Assessment: With virtual learning, it's critical to keep the student's performance level as a constant conversation between the student and instructor from the beginning of a course to the end. Ongoing communication throughout a semester about goals, progress, and assessment can help maximize student engagement and drive students to push further in class. Watch the video to the right to learn more.

udemy

We're Udemy, a leading destination for learning and teaching online. If you're new to online learning and not sure where to start, you're not alone. We've curated a free collection of courses for professionals. Take one of these courses and learn new skills (on us).

Benefits of teaching on Udemy

Gain access to learners around the world: As a Udemy instructor you can benefit from our global learner base. Our marketing programs and promotional tools can help you expand your reach. Even before you publish your course, our tools (like Marketplace Insights) help you identify topics that are in-demand and guide you to create engaging online courses for your intended learners — those individuals whom you think will benefit most from what you have to teach.

Own your content: You are welcome to share your knowledge on any topic with the exception of those noted on our list of restricted topics. With the Udemy marketplace, you create and own your content, which means you can host the same content elsewhere, and you may also upload any courses or content that you've already created.

Benefits of teaching on Udemy

Teach your way: Teaching online gives you an opportunity to potentially reach learners from around the world from the comfort of your home. Teaching with us allows for the flexibility to teach from anywhere, anytime.

Expand your earning potential: Teaching with Udemy gives you additional earning potential. Some instructors have been able to leave their jobs to teach full time with Udemy. It's free to create and publish a course with us, and you earn revenue share for every paid enrollment. As a Udemy instructor, you have the flexibility to offer your course for free (if it's under 2 hours) or for a price you set — and you have the option to promote your course with our promotional pricing. Learn more about our instructor revenue sharing and how to maximize your earnings.

Be a part of a thriving community: As a Udemy instructor, you join a thriving community of thousands of instructors from all over the world that offer support, guidance, and tips to help you succeed. Plus, gain access to our support team and helpful resources created by learning experts to help you get started on your journey to become an online instructor.

khan academy

A personalized learning resource for all ages.

Khan Academy offers practice exercises, instructional videos, and a personalized learning dashboard that empower learners to study at their own pace in and outside of the classroom.

How can Khan Academy be used for distance learning?

Khan Academy is a free resource for students, teachers, and parents.

We offer free lessons in math, science, and humanities from kindergarten through the early years of college. Students can use our exercises, quizzes, and instructional videos to learn and master skills. They will get immediate feedback and encouragement.

We are having regular webinars and live streams on Facebook and YouTube for students, parents, and teachers navigating school closures.

Set up your classroom for distance learning with our Quick start guide and video

Professional learning webinars on a variety of topics, including:

How one teacher helped his students ace math … by taking them back to kindergarten!

7 tips for effective remote learning—from setting up a schedule to addressing the emotional impact

How to engage and motivate your students … even when you're remote!

Khan Academy Kids for early learners

If you have a child ages two to seven, we recommend our free app, Khan Academy Kids. In addition to building early literacy, reading, writing, language, and math skills, the app encourages creativity and builds social-emotional skills. It is 100% free, with no ads and no in-app purchases. Khan Academy Kids is available on iTunes, Google Play, and the Amazon App store.

Khan Academy is a nonprofit organization: Our mission is to provide a free, world-class education to anyone, anywhere. With more than one billion children world-wide being impacted by school closures, we are experiencing soaring demand for our free resources. Our ability to quickly increase our services is made possible by Bank of America, AT&T, Google.org and Novartis. If you are able, please consider making a donation. Together, we can keep everyone learning.
