Assignment # 4

Structures

Q1. Write a C++ program using a structure `Student` with members:
`rollNo`, `name`, and `marks`. Input and display data for **one student**.

Q2. Create a structure `Employee` with members:
`id`, `name`, `salary`.
Input and display data of **3 employees using array of structures**.

Q3. Define a structure `Book` with:
`bookID`, `title`, `price`.
Write a program to **display only the books with price greater than 1000**.

Q4. Define a structure `Mobile` with members:
`model`, `brand`, `price`.
Input data of 5 mobiles and **display the most expensive mobile**.

Q5. Create a structure `Product`:

- productID
- productName
- quantity

Write a program to **find the total quantity of all products**.

Q6. Define a structure `Student` with 5 subject marks and calculate:

- Total
- Percentage
- Grade

Q7. Define a structure `BankAccount` with:

- accountNumber
- holderName
- balance

Allow the user to:

- Deposit amount
- Withdraw amount
- Display updated balance

Q8. Create a structure `Car` with members:

- carID
- model
- price

Write a program to:

- Store 5 cars
- Display only cars with price above 2 million

Q9. Define a structure `Patient` with:

- patientID
- patientName
- temperature

Display the data of patients having **temperature greater than 38°C**.

Q10. Define a structure `Result` with:

- rollNo
- name
- marks

Store data of 10 students and **display the topper (highest marks)**.
