Strings Practice 3

Code 3

Output 4

String Practice

Code

```cpp
#include <iostream>
#include <string>
using namespace std;

int main() {
    string S1 = "ekneedw";
    string S2 = "weekend";
    int choice, L1, L2;

    cout << "The scrambled word is " << S1 << endl;
    cout << "Guess the correct word!" << endl;

    cout << "Choose an option to unscramble the word:" << endl;
    cout << "1. Reverse" << endl;
    cout << "2. Swap letters by index" << endl;

    while (S1 != S2) {
        cin >> choice;

        if (choice == 1) {

            for (int i = 0; i < S1.length() / 2; i++) {
                char temp = S1[i];
                S1[i] = S1[S1.length() - 1 - i];
                S1[S1.length() - 1 - i] = temp;
            }
            cout << "Reversed word: " << S1 << endl;
        }
```

```cpp
                S1[S1.length() - 1 - i] = temp;
            }
            cout << "Reversed word: " << S1 << endl;
        }
        else if (choice == 2) {
            cout << "Enter two indices (0 to " << S1.length()-1 << ") to swap: ";
            cin >> L1 >> L2;

            if (L1 >= 0 && L1 < S1.length() && L2 >= 0 && L2 < S1.length()) {
                char temp = S1[L1];
                S1[L1] = S1[L2];
                S1[L2] = temp;

                cout << "Swapped positions " << L1 << " and " << L2 << endl;
                cout << "Current word: " << S1 << endl;
            } else {
                cout << "Invalid indices. Try again." << endl;
            }
        }

        if (S1 == S2) {
            cout << "Congratulations! You unscrambled the word: " << S2 << endl;
            break;
        }
    }

    return 0;
}
```
