Create a shopping cart which shows user a menu and asks do you want to shop for vegetables and fruits. Takes 'V' as input for vegetable and 'f' or Exit 'E' for fruits.

F	V
1. Orange 15 Rs./kg	1. Carrot 25/kg
2. Mango 25 Rs./kg	2. Tomato 15/kg
3. Strawberry 150 Rs./kg	3. Potato 30/kg

After taking order, input quantity of mangoes and outputs the bill and asks if you want to add more fruits.
takes to start of program and F shows
If user presses n, it ~~shows total bill and quantity~~ total bill, price and Quantity

```
#include <iostream>
using namespace std;
int main(){
    int orQuant=0;
    int manQuant=0;
```

}
