Quiz 1 (Section B)

Q1: Write output of following code ?

```
public class Student {
   public static void main(String[] args) {

      int marks = 85;
      int attendance = 70;
      boolean assignmentSubmitted = true;

      if (marks > 80 && assignmentSubmitted) {

         if (attendance >= 75) {
            System.out.println("Result: Grade A+");
         }
         else {
            System.out.println("Result: Grade A (Low Attendance)");
         }

      }
      else if (marks > 50 || assignmentSubmitted) {
         System.out.println("Result: Grade B");
      }else {
         System.out.println("Result: Fail");
      }
   }
}
```

Q2: Find the error in the code ?

```
public class GradeSystem {
   public static void main(String[] args) {
      int score = 75;

      if (score > 90) {
         System.out.println("Grade: A");
      }
      // Error 1 & 2 are in the line below
      else (score > 70) {
         System.out.println("Grade: B")
      }
      // Error 3 is here
      else if {
         System.out.println("Grade: C");
      }
   }
}
```

Q3: Statement: Write a Java program to calculate the Net Salary of an employee after deducting Income Tax based on the following annual income slabs:

Up to RS 2,50,000: No Tax.

RS 2,50,001 to RS 5,00,000: 5% of the amount exceeding ₹2,50,000.

RS 5,00,001 to RS 10,00,000: ₹12,500 + 20% of the amount exceeding ₹5,00,000.

Above RS 10,00,000: RS 1,12,500 + 30% of the amount exceeding RS 10,00,000. The program should take the annual income as input using the Scanner class and display the tax amount.
